**Notice Concerning Business Alliance with IKUSHINKAI Medical Group**  
**~ Comprehensive Support for Children's Futures**  
**through the Synergy of "Education × Healthcare" ~**

We are pleased to announce that our company has entered into a business alliance agreement with IKUSHINKAI Medical Group. ("IKUSHINKAI") to create powerful synergies between the education and healthcare sectors.

1. Purpose of the Business Alliance

IKUSHINKAI is a prominent medical corporation that operates eight clinics primarily in Tokyo and Kanagawa Prefecture, boasting a track record of approximately 280,000 patient visits annually, with a core focus on pediatrics.

IKUSHINKAI's mission, "Everything for children's smiles," deeply resonates with our Group's own philosophy, "Everything for the future of our children." Through this alliance, we aim to combine our Group's strengths in the educational business with IKUSHINKAI's expertise in pediatric medicine. This collaboration will provide comprehensive support for children, enhance guidance for students aspiring to enter medical school, generate innovative educational-medical synergies, and ultimately drive the corporate value of both organizations.

As a pioneering collaborative initiative, we successfully hosted "Dr. Rinsho Lab" (Dr. Clinical Lab) this past February. This medical career experience and medical school preparation event was designed for junior and senior high school students. Under the direct guidance of active physicians from IKUSHINKAI, participating students engaged in hands-on clinical reasoning. This initiative offered them a profound insight into the medical field and a valuable opportunity to experience their future dreams firsthand. Additionally, academic counseling sessions provided by instructors from "Medic TOMAS," our specialized preparatory school for medical school admissions, were highly well-received.

[ "Dr. Rinsho Lab" Event Overview ]

Moving forward, leveraging IKUSHINKAI's extensive medical expertise, we aim to implement the following initiatives:

(1) Empowering Aspiring Doctors through "Authentic Medical Experiences" in Collaboration with Active Physicians

With the support of IKUSHINKAI's medical team of approximately 50 doctors, we will regularly host guidance sessions and lectures featuring active physicians working on the front lines. Furthermore, we plan to design doctor experience tours for junior and senior high school students, career experience programs for after-school daycare center children to stimulate intellectual curiosity from an early age, and online clinical reasoning workshops.

(2) "Comprehensive Healthcare Support" for Students and Parents in Collaboration with Medical Experts

To help students and their families navigate the rigorous exam preparation period, we will provide mental healthcare guidance tailored for both students and parents, ensuring their psychological and emotional well-being.

(3) Professional Training and Internal Workshops for Group Employees and Instructors on Interacting with Children

By deepening the medical and psychological insights of our frontline educational staff, we will enhance our ability to provide precise, personalized guidance and emotional support tailored to the unique personality and characteristics of each student.

We are confident that this alliance, which merges the core strengths of both companies, goes beyond traditional academic support. It represents a significant step toward creating a brighter future for the next generation by holistically supporting children's growth—ranging from their physical and mental well-being to their future career development.
